Profile

Experienced Backend Developer with 3+ years of hands-on experience in PHP, Laravel, Wordpress and API development. Skilled in building scalable applications, integrating third-party APIs, and managing WS-based deployments. Passionate about clean code, performance optimization, and delivering business-driven software solutions.

Experience

Backend Developer, Webnyxa Technologies

09/2023 – Present | Noida

- Developed RESTful APIs and complex business logic using Laravel and Core PHP for production applications.
- Designed robust backend systems, including database structures, authentication flows, API architecture, and Swagger API documentation for frontend and third-party integrations.
- Integrated APIs including QuickBooks, Salesforce, OpenAI, Stripe, Firebase, Shopify, and WooCommerce, handling OAuth, webhooks, data mapping, synchronization, and failure scenarios.
- Worked on e-commerce and CRM-based platforms, building automated workflows to sync newly placed orders with Salesforce and QuickBooks for downstream customer, billing, and order processing.
- Worked with CI/CD pipelines, Git-based version control (GitHub, Gitab, Bitbucket), and managed application deployments and configurations on Apache and Nginx servers.
- Optimized API and database performance through query optimization, caching, and efficient database indexing.

Associate Software Engineer, Knocial India Limited

11/2022 – 08/2023 | Gurgaon

- Developed and maintained web applications using PHP, MySQL, HTML, CSS, JavaScript, and related web technologies.
- Worked across the software development lifecycle, including requirement analysis, development, testing, debugging, and deployment.
- Designed and optimized MySQL queries and database operations for efficient data management and application performance.
- Integrated REST APIs and third-party services into web applications based on project requirements.
- Identified and resolved application bugs, performance issues, and functional defects through debugging and testing.

Education

Bachelors of Technology (CSE), Sanskar Educational Group

08/2019 – 08/2023 | Ghaziabad

Intermediate, Vip Inter College

07/2017 – 06/2019 | Pilkhuwa

Skills

Backend & APIs — PHP | Laravel | REST APIs | Webhooks | Authentication | Queues/Jobs
Data & Performance — MySQL | Redis | Caching | Query Optimization | Database Indexing | Performance Optimization
Cloud & DevOps — AWS | Linux | Nginx | Apache | Git | CI/CD Pipelines | GitHub | GitLab | Bitbucket
CMS & E-commerce — WordPress | WooCommerce | Shopify
Frontend & AI Tools — HTML | CSS | JavaScript | jQuery | ChatGPT | Claude | Cursor | Codex | Antigravity

Projects

Manasprint, UPSC Exam Preparation App
- Developed a fast, secure backend for a UPSC learning platform using Laravel.
- Integrated RevenueCat API with real-time webhook updates for payment tracking.
- Engineered a backend supporting quizzes, custom tests, flashcards, badges, and user-progress tracking. improving engagement by 40%.
- Implemented efficient caching and optimized database queries, reducing API response time by 35%.

Technologies Used: Laravel, RevenueCat, Webhooks, MySQL

Multi-Vendor E-commerce Platform, Laravel Backend
- Architected and developed the complete backend for a multi-vendor e-commerce platform with role-based workflows for Admin, Vendor, and Customer.
- Built end-to-end modules for product management, cart, inventory/stock management, coupons & discounts, order processing, and order-status lifecycle.
- Designed REST APIs and relational database structures for vendor/customer operations, with validation and authorization across different user roles.
- Created comprehensive Swagger API documentation for endpoint testing and frontend integration.

Technologies Used: Laravel, MySQL, REST APIs, Swagger, RBAC

HealthWealth, Doctor Patient Management Platform
- Built a comprehensive doctor-patient management system enabling appointment booking, real-time chat, and video consultations.
- Integrated payment gateway and OpenAI API for smart health assistance and data insights.
- Implemented WebSocket-based communication for instant notifications and chat updates.

Technologies Used: Laravel, WebSockets, Webhooks, Payment Gateway, OpenAI API, MySQL

Artwork Production Platform, Workflow & Order Processing System
- Developed and maintained the Core PHP backend powering production workflows for vector artwork, embroidery digitizing and color-separation services.
- Built backend workflows around order processing, payments, file management and third-party integrations used in day-to-day production operations.
- Strengthened authentication and file-handling workflows while maintaining and extending a large legacy production codebase.

Technologies Used: Core PHP, MySQL, REST APIs, Webhooks, Payment Gateway, Quickbooks, OpenAI API
